The Golf-Bright™ 150-watt Wide Area Dispersion Floodlight is the ultimate replacement fixture for 400-watt metal halide and high pressure sodium box-format floods. With energy savings of 70%, this light is perfect for greens, driving ranges, miniature golf, parking lots, and outdoor venues. The unique full spectrum/full diffusion design is capable of replacing 400 to 500-watt high pressure sodium and metal halide fixtures for energy savings of up to 75%. Unique reflector geometry provides precision cut-off and minimal light pollution. Mercury is a solid encapsulated amalgam that makes Golf-Bright™ environmentally friendly and safe. No special handling is required. No hazardous material disposal is necessary.

The Golf-Bright™ spectrum is tuned to precisely resolve a golf ball against a dark sky or green grassy surface to provide stunning resolution with very low energy consumption. Instant strike means never having to wait for a warm-up or cool-down. The GB-FL-150WC1 will not disturb nocturnal wildlife such as owls and deer. Equally important, it is a neighbor-friendly fixture that can be focused away from surrounding buildings and homes. Golf-Bright™ lights are not affected by temperature.
