

PB-FL-60WC1

- Port-Bright™ **LUMENTEC®** tuned spectrum
- Color Rendition Index (CRI) > 90
- 100,000 hour life cycle
- 110V ~ 277V auto-sensing ballast
- Instant strike/re-strike
- Large format full dispersion bulb
- Full diffusion nano particle reflector
- Powder-coated all-weather aluminum
- IP65 rated WF2 anti-corrosion grade
- 150mph wind resistance

The Port-Bright™ 60-watt Mini Wide Area Dispersion floodlight is ideal for docks, walkways, beach fronts, parks, decks, boardwalks, trails, parking lots, and outdoor venues requiring Turtle-Safe™ lighting. The unique tuned spectrum full diffusion lamp is capable of replacing 100 to 200-watt high pressure sodium and metal halide fixtures for energy savings of up to 75% including ballast overhead. Unique reflector geometry provides precision cut-off and minimal light pollution. Mercury is a solid encapsulated amalgam that makes Port-Bright™ environmentally friendly and safe. No special handling is required. No hazardous material disposal is necessary.

Port-Bright™ lighting uses minimal power with the highest output within the visual acuity of the human eye. Instant strike means never having to wait for a warm-up or cool-down. The PB-FL-60WC1 will not disturb nocturnal wildlife such as owls and bats. Equally important, it is a neighbor-friendly fixture that can be focused away from surrounding buildings and homes. Port-Bright™ lights are not affected by temperature or moisture.

ULTRA-TECH™ LIGHTING
